CAPABILITIES STATEMENT
EMERGING TECHNOLOGIES

ABOUT LIONA ENTERPRISES

Founded in 2015, Liona Enterprises Inc. is a growing information technology services provider. Liona Enterprises develops products and solutions for government and commercial clients. We provide in-depth IT assessment, specifically tailored to integrate new and existing systems, and to secure the diverse technologies of an organization. Our services include:

- **IT System Design**
- **Equipment Purchase Assistance**
- **System Maintenance**
- **Hardware & Software Optimization**
- **Emerging Technologies**

Liona Enterprises proactively seeks and researches the latest and most innovative products on the market and works closely with our partners to bring them to a wider audience. We partner with other businesses to create customized solutions for our clients and provide consistently excellent results.

KEY DIFFERENTIATORS

- Excellent CPARS and Past Performance ratings
- Accomplished, diverse management team
- Certified Engineers and Project Managers on staff
- One-stop shop, collaborating with partners who broaden our base of experience so we can better serve our clients
- Accepts Government Purchase Cards (GPC)

- Developing and maintaining stable and secure IT infrastructure solutions that yield maximum returns on clients' investments
- Vendor-agnostic solutions mindset
- Mission support through organizational excellence
- Fixed costs with no hidden fees that stay within budget
- ISO 9000:2015 Certified (2023)

STRATEGIC SOLUTIONS

ZERO-TRUST SECURITY

Liona Enterprises provides **zero-trust security** solutions to protect our clients' networks, data, and systems from cyber-attacks. The zero-trust security model assumes that all network traffic, regardless of its origin, should be treated as untrusted until proven otherwise.

By working closely with our clients to understand their unique security needs, Liona designs tailor-made security strategies that align with clients' business objectives and regulatory requirements. Liona provides identity and access management, network segmentation, multi-factor authentication, and continuous monitoring to ensure security.

Our team has extensive experience implementing zero-trust security architecture across different industries and environments, including cloud, on-premise, and hybrid deployments. Our goal is to provide a holistic, adaptive, and secure environment that helps our clients to protect their digital assets and reduces the risk of cyber-attacks.

STRATEGIC SOLUTIONS

AUGMENTATION

Staff augmentation enables businesses to access the specialized skills and resources they need to stay up to date on rapidly changing technologies, without taking on the risks and expense associated with hiring permanent employees. By leveraging the expertise of external contractors and consulting firms, Liona Enterprises can help companies quickly and easily scale up their workforce to meet the demands of the rapidly evolving technology environment. Liona Enterprises works (and networks) to find the supplemental staff our clients need to gain and maintain a competitive edge and to benefit from innovation in a dynamic, fast-paced technological landscape.

VALUE ADDED RESELLING

Liona Enterprises specializes in providing **value-added reselling** services to businesses and organizations in a variety of industries. Liona Enterprises purchases products and either enhances them with other features and services for resale, or customizes them to the individual needs of the client. Liona offers a wide range of these augmented products and services from trusted manufacturers and vendors to meet the unique needs of our clients.
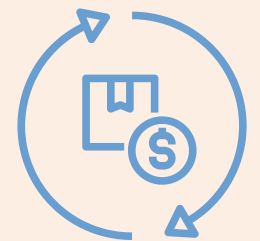

CYBERSECURITY

Liona Enterprises provides comprehensive **cybersecurity** solutions to protect sensitive data and systems against a wide range of threats. Our services include threat intelligence, vulnerability assessments, penetration testing, incident response planning, and disaster recovery. Our cybersecurity experts have extensive experience in identifying, assessing, and mitigating risks and threats, and we are equipped to handle advanced persistent threats (APTs), zero-day vulnerabilities and social engineering. Our team is well-versed in the latest security technologies, including firewalls, intrusion detection systems, and encryption, and can help to design, implement, and manage security systems that align with industry standards such as ISO 27001, NIST, and SOC 2.

On average, companies spend
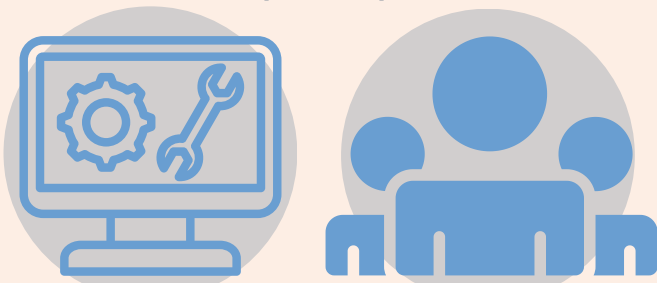

10% of their IT budget
